

Science
6th Grade
Mrs. Levinson
Week of March 30-April 3, 2020

On Monday I will start sending a **journal question**. You need to write it in your notebook and start finding the answers. They will be on www.sciencedaily.com. You will need to write two sentences as the answer from looking it up. Journals will be collected when we get back to school. If we don't have a date for a long time I will have you email them to me every two weeks.

Chapter 8 - Earthquakes

Monday - March 30

Read Section 1- "What are Earthquakes?"- pages 224-229 and define the vocabulary words in your notebook. There are only 6. Answer questions #1-7 only on page 229.

Tuesday - March 31

Fill in the directed reading for section 1 - "What are Earthquakes?"

Wednesday - April 1

Read section 2 - "Earthquake Measurement" - pages 230 - 233. Define the vocabulary words in your notebook. There are only 4. Answer questions 1-5 on p. 233.

Thursday - April 2

Fill in the directed reading for section 2 - "Earthquake Movement".

Friday - April 3

Take the open book quizzes for section one and two.

Notes: Please keep all your work organized and in your notebook. I might ask you to submit items to me. Please be on top of your work.
