

Science  
7th Grade  
Mrs. Levinson  
Week of March 30-April 3, 2020

On Monday I will start sending a **journal question**. You need to write it in your notebook and start finding the answers. They will be on [www.sciencedaily.com](http://www.sciencedaily.com). You will need to write two sentences as the answer from looking it up. Journals will be collected when we get back to school. If we don't have a date for a long time I will have you email them to me every two weeks.

## ***Chapter 11 – Introduction to Atoms***

### **Monday – March 30**

Read Section 1- “Development of the Atomic Theory”- pages 312 - 317 and define the vocabulary words in your notebook. There are only 4. This is a long section. Take your time. You can split it between today and tomorrow.

### **Tuesday – March 31**

Answer questions #1-7 only on page 317.

### **Wednesday – April 1**

Fill in the directed reading for section 1 – “Development of the Atomic Theory”.

### **Thursday – April 2**

Take the open book quiz for section one.

### **Friday – April 3**

Read section 2 – “The Atom” - pages 318-321. This is only half the section. It is very long. Define the vocabulary words (the first 5) in your notebook.

Notes: Please keep all your work organized and in your notebook. Please be on top of your work. Please submit the quiz for section 1 on Thursday April 2 by 3pm.
